## 1 Operator & 90 Seconds Is All It Takes

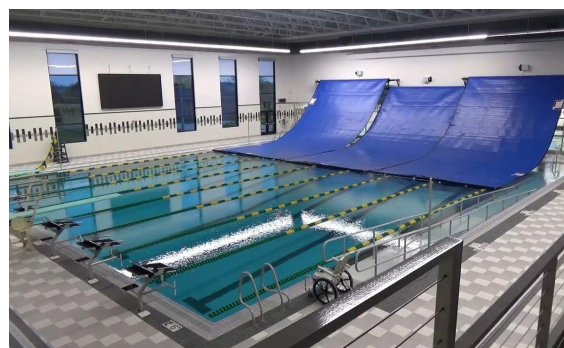

Our automated reel system eliminates the hassle of deploying and retracting large pool covers.

The ease of a wireless remote allows the operator to deploy and retract the automatic pool cover from anywhere in the room with a push of a button.

**30% of all purchased pool covers are never used because "it's too hard to roll them in and out every day"?!**

"We bought a pool cover from some online store last year, but the daily task of rolling it out has become incredibly frustrating. It takes 2-3 people and about 20 minutes to put the cover on. Unfortunately, my staff often 'forgets' to cover the pool at night."

Watch as our Automatic Reel System completely covers a 25-yard pool in just 90 seconds!

**Pool covers only work if you use them. Cover your 25-yard pool in 90 seconds with our easy to use Alta Pool Cover System!**

*"The automatic reel system is overall an awesome feature."*
