Power Winder

Alta Enterprises, Inc. has been manufacturing the Power Winder for more than 10 years. The Alta Enterprises' Power Winder uses a 12 Volt non-spill, deep cycle marine grade rechargeable battery. The charger-battery tender is waterproof and installed in a watertight NEMA 12 enclosure. The 12 Volt DC hydraulic motor uses nontoxic biodegradable hydraulic oil. All hydraulic hoses are rated to 3000 PSI. The body of the Power Winder is made of a 304L SS plate and 2" tubing. All stainless steel is powder-coated matte black. The Power Winder uses marine-grade switches, connectors, and fuse holders. The Power Winder comes with 2 heavy-duty, non-marring, non-swivel castors and 2 heavy-duty, non-marring, lockable swivel castors. The Power Winder has a variable speed controller allowing the user to custom tailor the speed required to effectively retract the covers off the pool. The Power Winder is able to roll 164 linear feet of blanket onto one storage reel. The Power Winder can come with an optional remote control system. The remote allows the operator to run the Power Winder in two speeds, a high and a low.
